

SecureApp 2025 *Joint Summit*

Collaborating to Secure the
Application Supply Chain

OWASP

ABOUT THE SUMMIT

SecureApp 2025 – Joint Summit is a collaborative OWASP initiative that brings together leaders from multiple regional chapters to explore and advance the security of modern application supply chains. This full-day event in Kuwait will unite practitioners, researchers, and organizations working to build trustworthy and resilient software systems.

DISCUSSION & INSIGHT

- Showcase practical tools and frameworks like CycloneDX, Dependency-Track, and DefectDojo.
- Promote secure software supply chain practices.
- Engage with experts through talks, panels, and case studies.

TOPICS

- Application Supply Chain Security
- Software Bill of Material (SBOM) and its role in modern DevSecOps.
- Vulnerability and Risk Management.
- Secure CI/CD pipelines.
- Application Supply Chain Governance
- Real-world use of OWASP projects in development environments.

TARGETED AUDIENCE

- AppSec professionals
- Software developers & architects
- Security engineers
- CISOs and tech leads
- Academia & students
- Public/private sector partners

Hosted by
